S.Dasgupta,C.H.Papadimitriou,andU.V.Vazirani 13 1. Is it correct? 2. How much time does it take, as a function of n ? 3. And can we do better? The first question is moot here, as this algorithm is precisely Fibonacci's denition of F_n . But the second demands an answer.

Chapter 7 Linear programming and reductions Many of the problems for which we want algorithms are optimization tasks: the shortest path, the cheapest spanning tree, the longest increasing subsequence, and so on. In such cases, we seek a solution that (1) satisfies certain constraints (for instance, the path must use edges

The actual textbook is an excellent introduction to basic classes of algorithms. Most things were pretty clear, and the chapter on NP-completeness ties everything together nicely when it discusses reductions.
