AWK is a programming language designed for text processing and typically used as a data extraction and reporting tool. It is a standard feature of most Unix-like operating systems.. The AWK language is a data-driven scripting language consisting of a set of actions to be taken against streams of textual data " either run directly on files or used as part of a pipeline " for purposes of ...

### **AWK - Wikipedia**

I have created an awk programming language cheat sheet to help new programmers learn the language faster and better. It compares features of awk, nawk and gawk and contains predefined variable summary, io statements, numeric, bit manipulation, string, i18n and time functions. Available in .doc and .pdf formats.

Conditional expressions. The second type of expression in AWK is the conditional expression. This is used for certain tests, like the if or while. Boolean conditions evaluate to true or false.

### **Awk - A Tutorial and Introduction - by Bruce Barnett**

In computer science, the Boolean data type is a data type that has one of two possible values (usually denoted true and false), intended to represent the two truth values of logic and Boolean algebra. It is named after George Boole, who first defined an algebraic system of logic in the mid 19th century. The Boolean data type is primarily associated with conditional statements, which allow ...

Originally developed by Alfred Aho, Brian Kernighan, and Peter Weinberger in 1977, AWK is a pattern-matching language for writing short programs to perform common data-manipulation tasks. In 1985, a new version of the language was developed, incorporating additional features such as multiple input files, dynamic regular expressions, and user-defined functions.
