Global consumption of 3D printing systems, printing materials, parts, software, and related services amounted to over \$13 billion in 2016. Also, worldwide spending on 3D printing is expected to have an annual growth rate of 22.3% in the next few years, and \$29 billion of revenues are expected by 2020.

The rapid increase in the breadth and scope of transformations that involve metal-promoted activation of C-H bonds is fundamentally changing the field of synthetic chemistry. Direct arylation polymerization is a newly established synthetic protocol for atom economical, effective, and affordable preparation of conjugated polymers, which continue to be incredibly advantageous as operative ...

Cryopreservation for embryos is used for embryo storage, e.g., when in vitro fertilization (IVF) has resulted in more embryos than is currently needed.. Pregnancies have been reported from embryos stored for 16 years. Many studies have evaluated the children born from frozen embryos, or "icebabies".

A hygrometer (/ h aÉ^ É r É' m É^ t É™r /) is an instrument used for measuring the amount of humidity and water vapor in the atmosphere, in soil, or in confined spaces. Humidity measurement instruments usually rely on measurements of some other quantity such as temperature, pressure, mass, a mechanical or electrical change in a substance as moisture is absorbed.

Kobelco has manufactured reciprocating compressors since 1915 and now has an installed base of more than 2,300 units around the globe. Kobelco reciprocating compressors (API 618) have been serving in a wide variety of heavy industry applications: oil refining, natural gas, petrochemical and energy.
