You've probably heard of High Dynamic Range (HDR) Photography, it's made quite an entrance into the world of digital photography. If you haven't, the HDR process is accomplished by taking multiple exposures of a high contrast scene (usually a landscape or cityscape), at different levels of ...

### **Setting Up Your Digital Camera For HDR Shooting**

WHAT IS HDR? Many people have a wrong idea about what HDR photography really is. HDR, what stands for High Dynamic Range (what means nothing more but wide range of luminosity and contrast in the scene), is neither a special effect nor a post-processing technique. Remember that. HDR is trying to solve a following problem.

### **HDR Tutorial - Learn how to create natural looking HDR images**

High-dynamic-range rendering (HDRR or HDR rendering), also known as high-dynamic-range lighting, is the rendering of computer graphics scenes by using lighting calculations done in high dynamic range (HDR). This allows preservation of details that may be lost due to limiting contrast ratios. Video games and computer-generated movies and special effects benefit from this as it creates more ...

Photography is the art, application and practice of creating durable images by recording light or other electromagnetic radiation, either electronically by means of an image sensor, or chemically by means of a light-sensitive material such as photographic film. It is employed in many fields of science, manufacturing (e.g., photolithography), and business, as well as its more direct uses for art ...

- This week on The Practicing Photographer, we're going to look at a way that you can feel really stupid. At least this is a way that I often feel really stupid. I've got a big, long list of those... What we're going to talk about this week is the diopter control. Now, you may already know where I'm going with this if you're familiar with your diopter control.
